**Pre-diagnose your symptoms
with Artificial Intelligence
enabled healthcare platform**
.....

Delivering best-in-class digital transformation solutions to businesses, CRMIT solutions has become a preferred solution provider across various industries. However, what makes CRMIT solutions remarkable among competitors is its ability to promote solutions to the healthcare industry. The company supports AI-led solution called CallADoc to deliver a pre-diagnostic AI platform and a healthcare advisory channel that consumers can trust.

Launched in 2016, CallADoc is a patient-engagement platform powered by Artificial intelligence and built on a mobile-first platform to provide a user-friendly interface for patients, doctors, and bots on the same platform. Using the latest machine learning and bot features technology, the company provides a one-click solution to lead people to live a healthy and happy life.

Vishal Reddy
Co-Founder,
CallADoc

“CallADoc was started with a vision to provide affordable and easily accessible healthcare,” says Vishal Reddy, Co-founder of CallADoc.

This AI-enabled healthcare platform has the ability to pre-diagnose the disease, which enables the patient to access 24*7 into the platform for early prevention or potential ailments of the disease. This platform improves the patient-engagement experience by listening to the concern of patients, helping patients to identify their disease, and guiding them through the various pre-diagnosis procedure.

CallADoc

- **listens** to you, asking questions to better understand your concern
- **helps** you make sense of your health concerns and identify what's wrong
- **guides** you to the various pre-diagnosis with AI enabled healthcare platform

Besides this, CallADoc platform also features a virtual medical consulting with HISA (Health Intelligent Support Assistant) enabled bot. This feature allows the doctors and healthcare service providers, to automate Patient Case Sheet, from conversations with HISA coupled with Patient 360 (EHR complaint), to go through the pre-diagnostic history of patients before the actual patient visit. This results in reduced patient check-up time and allows doctors and physicians to attend to more patients.

Reasons behind Client Success

CallADoc is a healthcare-centric platform designed with keeping patients' needs in mind. Today, “many people across the world are suffering basic health problems and are deprived of primary healthcare,” says Vishal. Taking this into account, CallADoc has ideated a best-in-class chatbox services. Developed using advanced machine learning and bot features, these chatbox services eliminates many of these healthcare problems and thereby enables people to live a healthy and happy life.

However, what really differentiates CallADoc from

its competitors is its ability to provide 24/7 access to basic yet reliable symptom checks which aides in early diagnosis and prevention for potential ailments. It also improves initial engagement experience and patient satisfaction with trusted doctors and physicians. With all these features in place, CallADoc has become the preferred platform for patients.

Future Vision

Time has changed the landscape of the healthcare industry. It is expected that AI will have a major impact on healthcare from mining medical records to designing treatments. AI has the power to eliminate repetitive day-to-day tasks by providing efficient healthcare services. CRMIT Solution believes that AI can provide more affordable and quality healthcare services through CallADoc.

When asked about the future plans, Vishal says, “By 2020, we aim to provide our services using Artificial Intelligence and reach out at least million consumers seeking healthcare assistance. Our mission is to evolve beyond just offering answers to providing a comprehensive patient navigation system that guides consumers to the right health care provider.”

“

CallADoc was
started with a vision
to provide affordable
and easily accessible
healthcare.
